MSS Series Universal Single Shaft Shredder

- Double-shaft hydraulic feeder
- Automatic reversal of 1 type roller cutter
- 45° discharge
- Hydraulic screw feeder
- External driving gear

In applications such as shredding pallets and wasted wood, IBC containers, big size electrical appliances, plastics purges, wire and cables and many others.

MSH Series Heavy Duty Granulator

- German heavy industrial line machine
- Double-shaft feeding and discharging roller
- Heavy duty 7 type rotating roller
- Highly efficient large capacity
- European Standard Safety System

In applications such as PVC, HDPE pipes, PET bottles, thick sheets, films, post-consumer plastics, big garbage cans, plastic purges and wire and cables.

MKC compacting and single screw extruder line (single stage)

MKC compacting and single screw extruder line (double stage)

METIS[®]
Metis, makes your life clean & nice!

Hangzhou Metis Houseware Co., Ltd., established in 2013, combining with our cooperation partner Taizhou Rising Plastic Co., Ltd., is a professional manufacturer with more than 15 years' experience in the areas of houseware and cleaningware. Our own brand METIS has enjoyed a good reputation in domestic and oversea markets. We own a factory which is located in Taizhou City which is China's famous town for plastic and mold. We imported a lot of automatic fiber planting machines from Germany and Italy. All of these greatly improve our efficiency and capacity.

In addition, we have obtained ISO9001 and BSCI certificates. We have a complete manufacturing process in producing brooms, brushes, squeegees, spray mop, storage series, food container, plastic dustbin, offering quality products and OEM/ODM/OBM services to a wide range of clients all over the world.

We implement the culture of high quality, prompt delivery and good customer service while meeting your specific requirements. Our company is firmly established as a reputable supplier to provide good products with competitive prices both at home and abroad, with our success built upon establishing long-term relationships with the clients.

Taiyide Plastic Machinery is one of the professional plastic injection moulding machinery manufacturer in China. Taiyide brand was awarded the honor of "Famous Brand" by Zhejiang government. The machines are high efficiency and energy saving. The specifications are from 50 grams to 20,000 grams. Now, our machines are very popular in plastics manufacture industry and stay high standards in the international market. We do not only provide a machine to customer, but a fine solution and strategy, and try to make individual machines for customers whose have special requirements.

Company has ISO9001:2008 quality management system certification and CE certification. The main parts of the injection moulding machine come from Germany, Italy, Japan and other countries. Introduced advanced international design concepts to make our products more valuable. Every single machine should has a rigorous testing, assembly, commissioning.

SY-30BY 塑料瓶盖模压机

SY-30BY PLASTIC BOTTLE CAP MOULDING MACHINE

压塑工艺已经成为全球熟知的技术，已有大部分的软饮料塑料瓶盖是通过压塑工艺生产的。该系列机型具有以下几个优点：

1. 该机采用液压式油泵供力，压力大而稳定，传动更稳定平和。能为每腔模具提供相同的压力，因而做出来的盖子外观更加美观，瓶盖内部结构更加紧密而且有助于提高模具的整体使用寿命。
2. 瓶盖成型速度更快，与规定要求的质量标准偏差更小，从而提高和满足客户的质量要求。同时该系列不仅扩大了产品种类，也扩大了制盖直径范围，进一步满足了客户多方面的需求。
3. 从能耗，物耗及环保角度综合考虑，该机的压塑工艺是现在和未来制盖方式的发展方向及趋势，它为智能化，信息化及控制流程提供了操作平台。
4. 该机具有自动化程度高，高效，多种模具互换，一机多用，一人多机等优点。

SY-30By-S 液压型塑料瓶盖模压机已经获得国家多项专利，其中一项为发明专利（专利号 ZL200710071086.7）及 CE 和 ISO 认证。

The compression molding machine is already a well known technology worldwide; many of the caps for soft drinks are produced through compression. SY-30BY hydraulic cap molding machine has the following advantages:

1. This machine adopts the oil pump to provide the pressure, the pressure is bigger and stable, and it can provide the same pressure to every mold. So the cap made from this machine looks more beautiful and with tight structure. Also it is good for improving the mold use life.
2. Cap molding speed faster, less difference of required quality. Moreover, this type machine expands the product type and range of cap diameter to satisfy the individualizing demands of customer.
3. From the consideration of energy and material consumptions and environmental protection, this compression molding machine is the trend of present and future. It provides a good platform for intelligent, informational and control process.
4. This machine has the following advantages: high degree of automation, high efficiency, change of different molds, multiuse of one machine and so on.

外商考察 交流学习
 Forel Investigation
 Communication & Mutual Learning

公司多年来坚持贯彻“走出去、引进来”发展战略。“走出去”战略的实施开阔了公司眼界，开拓了市场，让公司认识到与国外同类公司之间存在的差距，明确了发展方向；“引进来”战略的实施不仅引得“凤来栖”，成立中美合资企业“衢州开源密封有限公司”，更全面促进了公司经营管理、质量控制等方方面面的提升。比天空更宽阔的是人的胸襟，公司重视任何一次与外商、国内专家交流的机会，请速来，在学习中不断进步企业发展。

Our company has adhered to the development strategy of "going forward towards the global world and attract more backwards" for many years. The implementation of the "going forward towards the global world" strategy broaden the horizon of the company and explore more market, enable the company to understand the gaps between the company itself and other foreign similar industry company so as to determine the development orientation explicitly, while the carrying out of the "attract more backwards" strategy not only attract "pigeons to stay here" and therefore the establishment of the Sino-US joint venture of "Quchou Kaiyuan Sealing Co., Ltd.", and moreover this strategy fully promote the corporate operation managing standards and quality control levels as well as brought along pilotations in other aspects of the company. There is human being's chest which is far wider and more foremost than the sky, and the company takes great importance in every opportunity for the communications with foreign business people and domestic experts, with modest mind to accept the teaching from them and thus to promote the enterprise development continuously during learning.

WHY CHOICE DUO YUAN

3 ADVANTAGES

1. DUO YUAN COMPREHENSIVE STRENGTH

LARGE-SCALE PRODUCTION BASE, STRONG R&D AND PRODUCTION TEAM, MULTIPLE PROFESSIONAL PRODUCTION LINES, GUARANTEE DELIVERY TIME

2. STRONG PROFESSIONAL STRENGTH

HAS A GROUP OF OUTSTANDING DESIGN AND PRODUCTION PERSONNEL, THE USE OF SOPHISTICATED-MEASUREMENT MEANS, SOPHISTICATED TECHNOLOGY, TO ENSURE HIGH QUALITY.

ACCURATE SAMPLE PREPARATION AFTER PRODUCT DESIGN AND BEFORE MOULD OPENING TO ENSURE DATA CORRECTNESS AND MOULD HEIGHT, PRECISION AND ACCURACY

3. PERFECT SERVICE SYSTEM

ORDER TO PRODUCTION PROFESSIONAL ONE-TO-ONE "HOUSEKEEPING" ORDER TRACKING SERVICES, ORDERS

REAL-TIME REPORTING ALLOWS YOU TO "MANAGE" FACTORIES AT CLOSE RANGE

7*24-HOUR RAPID RESPONSE MECHANISM TO MEET YOUR ORDER REQUIREMENTS

Hangzhou Yongsheng Plastic Antistatic Material Factory

—Professional Antistatic Agent Manufacturer 20yrs+

Yongsheng Plastic with over 20 years of research and development of fatty amines, fatty acid surfactant production, as well as the company's technical team for many years of professional anti-static agent combination technology and experience. Our company's antistatic additive products have been widely

used in the field of plastic and other polymer materials, especially used in BOPP film which has leading position in the domestic market. HBS series are internal antistatic additives that offer a solution to problems related to the accumulation of electric charges on plastic materials, e.g. spark formation during processing and dust attraction during storage. Once incorporated into the polymer they migrate to the surface of the finished article, giving the required antistatic effect through interaction with environmental humidity. Accordingly to play a significant role in reducing the surface resistance of the plastic material, effectively control and eliminate the role of static electricity, to prevent fires caused by static electricity, electric shock, explosions and other accidents.

1
ANTISTATIC ADDITIVES
alkane sulfonate
quaternary ammonium salt

2
SLIP AGENT
Anti-blocking function
Erucamide
Oleamide

3
PE ANTIFOGGING ADDITIVES
Polyol complexes
(Agricultural use)

Antistatic Agent HBS-129A

High active lipid antistatic agent with excellent thermostability

Advanced pellets Antistatic agent HBS-300

ethoxylated amine glyceride granule product

PE Antifogging Additives TST 236

PE EVA agricultural film use flake form
